Profile

Motivated full-stack developer with a solid foundation in computer science and hands-on experience architecting comprehensive web applications. A passionate about building highly responsive, user-centric platforms and solving complex real-world problems through clean code.

Education

Chitkara University, Himachal Pradesh, India **August 2023 – Expected 2027**
B.E. in Computer Science Engineering *CGPA: 8.73/10*

Arniko Awasiya Secondary School, Biratnagar, Nepal **2020 – 2022**
High School *GPA: 3.62/4*

Relevant Coursework

- Data Structures
- Computer Networks
- DBMS
- Object-Oriented Programming
- Operating Systems
- Web Development
- Software Engineering
- Algorithms and Data Structure
- Cloud Computing (Basics)

Skills

Programming Languages: C/C++, Java, JavaScript, SQL
Frontend: HTML, CSS, React.js, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, JWT, bcrypt, Authentication, Authorization
Databases: MySQL, MongoDB
Core Concepts: OOP, Data Structures, Debugging, API Design, Agile Basics
Tools & Cloud: Git, GitHub, Postman, VS Code, AWS, Docker

Projects

Society Management App **Live**

- Developed a full-stack Society Management platform using React.js, Node.js, Express.js, MongoDB, and Tailwind CSS supporting 5+ major modules including visitor management, complaint tracking, billing, and community polls.
- Implemented JWT authentication, bcrypt password hashing, and role-based authorization for Admin and Resident users, securing all protected API endpoints.
- Designed RESTful APIs with MongoDB for complaint management, electricity billing, visitor tracking, and announcements.
- Applied Express Rate Limiter, Helmet, CORS, and input validation to improve backend security and prevent brute-force attacks.

Expense Tracker **Live**

- Built an Expense Tracker supporting multiple users, real-time expense calculations, and secure authentication.
- Wrote the math and logic to accurately calculate who owes money to whom in real-time.
- Handled user login, database storage, and API connections to make sure all data is saved securely.

Hackathons and Activities

- Collaborated with a team to design and develop a software solution within the hackathon timeline.
- Contributed to backend development, feature implementation, and integration while working under strict deadlines.
- Strengthened debugging, collaboration, and problem-solving skills by resolving technical challenges during development.

Strengths

- Strong foundation in Java, Data Structures, and Object-Oriented Programming.
- Hands-on experience building and deploying MERN stack applications using React.js, Node.js, Express.js, and MongoDB.
- Comfortable developing REST APIs, integrating databases, and debugging backend applications.
- Passionate about backend development and continuously improving technical and problem-solving skills.
- Able to take a feature from requirement analysis through development, testing, and deployment.
